Dear Hiring Manager,

I am writing to inquire about potential job openings in the fields of Computer Science and Information Technology. I am confident that I possess the necessary qualifications for entry-level positions, as outlined in my resume. Currently, I am a student at Kean University, pursuing a Master of Science in Computer Science, and I would appreciate the opportunity to further discuss how I can contribute to your team.

My education at Kean University, combined with my previous studies at Union County College, has strengthened my skills and knowledge in computer coding, hardware, and software. I have developed and tested programs using PHP, HTML, JS, CSS, and many other languages, achieving an intermediate level of proficiency. With an Associate degree in Computer Science from Union County College, a Bachelor's degree from Kean University, and my ongoing pursuit of my Master's degree from Kean also, I am eager to apply my growing expertise in the previously listed coding languages and other areas to benefit your organization.

In addition to my academic background, I have hands-on experience in IT support. During high school, I worked extensively with computer hardware and software, resolving various technical issues and performing regular maintenance. I assisted students, teachers, and staff with their technological needs, ensuring the smooth and efficient operation of the school's technology. This experience has honed my problem-solving abilities and my capacity to manage multiple tasks effectively.

Enclosed is my resume, which provides further details on my skills and work history. I would welcome the opportunity to discuss potential job positions that align with my qualifications. Please feel free to contact me at (908) 926-4590 or via email at thomsolo@kean.edu to schedule an interview. Thank you for your time and consideration.

Best regards,
Solomon Thomas
